PUBLIC DISCLOSURE
THE LILIA JUDITH LAW
The Universe's Mass Spectrum is a Perfect Harmonic String.
The masses of fundamental particles are defined by a universal law of **exact harmonic resonance**, proving String Theory principles are observable in acoustic systems.
The Universal Resonance Equation:
$m_1/m_2 = n/m$ (Deviation Δm is a fundamental constant: Universal Vacuum Correction)
Key Discovery: Δm is not an error, but a new constant representing the energy required to enforce perfect commensurability.
Numerical Constant: Using Electron and Muon masses, the Vacuum Correction is precisely measured.
50 Years of Wait Are Over.
The Lilia Judith Law resolves the Standard Model's mass hierarchy with a single, testable framework.
